

Accredo® Specialty Pharmacy

Support beyond sleep therapy initiation

Helping patients stay engaged throughout their sleep therapy journey

Supporting patients prescribed sleep therapies often extends well beyond the initial prescription. Accredo® Specialty Pharmacy partners with neurology practices to help coordinate ongoing patient support, clinical engagement and refill management throughout the treatment journey.

From therapy initiation through ongoing treatment, Accredo helps providers address financial, clinical, and adherence barriers while giving patients the support they need between office visits.

Why patients fall off therapy

Financial barriers

Out-of-pocket costs and affordability concerns can delay or interrupt treatment.

Sleep therapy complexity

Sleep therapies require ongoing education, refill coordination and proactive outreach from specialty-trained clinicians.

Side effects and clinical concerns

Without timely education and guidance, patients may discontinue therapy prematurely because of side effects or adverse reactions.

Limited engagement and follow-through

Patients may need reminders, education and ongoing support to stay on track.

How we help patients stay on therapy

- ✓ **Ongoing clinical support:** Specialty-trained clinicians support individuals with sleep disorders with ongoing education, refill coordination and proactive outreach throughout therapy.

Patient services →

- ✓ **Financial assistance navigation:** We help eligible patients identify and access available financial assistance resources.

Accredo copay assistance →

- ✓ **Connected digital support:** Patients can manage therapy, receive refill reminders, access prescription information, and stay connected through the Accredo web portal, mobile app, text messaging and interactive voice response (IVR).

Digital tools →

Supporting your practice

- ✓ **Supporting your staff:** Our team provides proactive patient support so your office can spend less time managing follow-up activities.
- ✓ **Fewer escalations:** By engaging patients throughout therapy, we help address questions and barriers before they become larger issues. Reducing barriers allows more time to focus on patient care.
- ✓ **A trusted extension of your team:** We work collaboratively with your practice to help deliver a seamless patient experience from prescription through ongoing therapy.

Supporting providers with measurable results

1,500+ Prior authorizations (PA) managed annually

Our collaborative PA team helps facilitate prior authorizations for provider offices.¹

3-7+ days faster

Expected improvement in turnaround time

Collaborative PA is expected to:

+ Reduce PBM PA decisions by 3+ days

+ Reduce medical PA decisions by 7+ days¹

600K+ prescribers connected through EMR integration

EMR connectivity with more than 600,000 prescribers nationwide helps streamline information exchange and supports faster therapy initiation.¹

See how Accredo supports patients beyond the prescription

Our specialty-trained clinicians and support teams help patients navigate financial, clinical, and adherence barriers, all while helping reduce administrative burden for your practice.
