

Accredo® Specialty Pharmacy

More visibility.
Less follow-up.
Better specialty
therapy support.

Helping patients start—and stay on—specialty therapy shouldn't mean more work for your practice.

For practices treating patients with sleep disorders, the prescription is only the beginning of the specialty therapy journey. Prior authorizations, onboarding, patient education, and financial assistance can influence how quickly patients begin therapy and whether they continue treatment as prescribed.

When these activities take place after prescribing, providers and care teams can lose visibility into whether patients complete onboarding, secure financial assistance, start therapy on time, or need additional follow-up.

Accredo® Specialty Pharmacy helps reduce uncertainty after the prescription by coordinating care, supporting patients, and keeping your team informed throughout treatment.

Keep patients—and your practice—moving forward

Help patients get to therapy faster

Support during therapy initiation helps reduce delays and keep therapy on track.

Eliminate administrative friction

Coordinated specialty pharmacy services help your team spend less time tracking patient progress and more time focused on care.

Spend more time focused on patient care

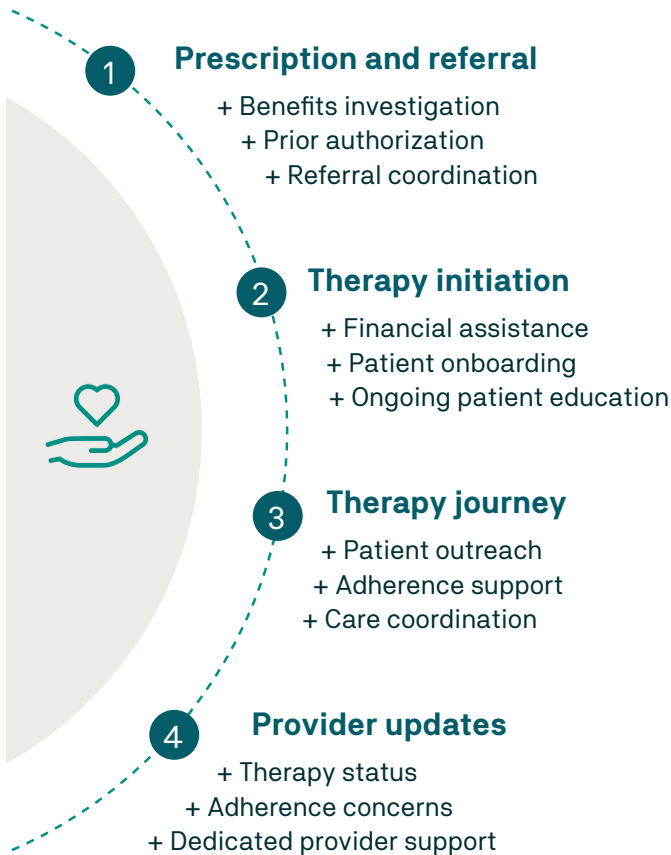

We provide support that streamlines intake processes and access to financial assistance.

Support beyond the prescription

Our specialty therapy support is ongoing, helping practices at every critical stage.
